MANAGED
ACCESS CONTROL

Security services to manage your facility with confidence

SECURITY
WITH FLEXIBILITY

The main purpose of an access control system is to control movement from one area to another. Your employees are given a personal key card, fob, or code that they use at readers or keypads. You also assign "rights" to each employee that give them access only to certain doors or areas and/or only on certain days and times.

Choose your level of protection

With options to arm All, Perimeter, or Area, you can have the peace of mind that your investments are well-protected.

Set the alerts from the categories you would like notifications from

Choose to receive notifications in cases of Alarms, Troubles, and Arms/Disarms.

Manage system schedules

Schedule Arming/Disarming, your Favorites, doors, Z-Wave devices and other outputs.

Control multiple devices with one tap

With the Favorites Settings you can group your most-used devices and turn them on or off with a single tap.

Multiple system control

Manage multiple locations seamlessly from the same app.

Managed Access Control & Security Services let you reap the full benefits of your system with fewer headaches. We can track employee movement and provide detailed reporting that lets you review who went where and when.

Customized Control

We will work with you to create a customized plan to protect all areas and buildings or only selected buildings or areas. Contact us with any needed updates to employee rights, or changes to your door schedules and configurations, and they will be quickly implemented. We can add your new employees, modify employees' access privileges, or remove access entirely, so you never have to re-key a door again.
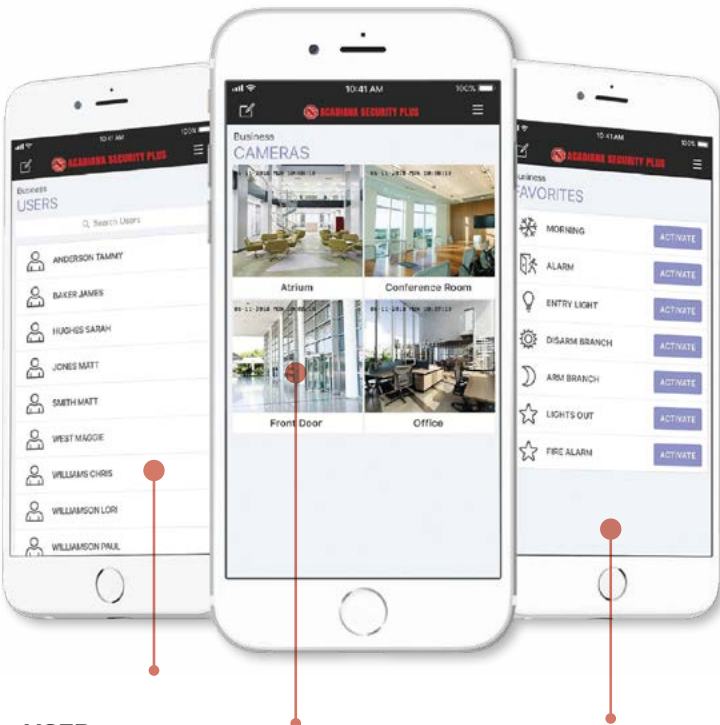

Wireless Entry

The one- and two-button wireless key fobs provide the ability to arm/disarm security systems or transmit a panic command. The built-in proximity credentials add the ability to arm/ disarm and interact with access control proximity readers. All 1144 Series Key Fob transmitters are portable, water resistant, and designed to be clipped to a keychain or lanyard. The LED visual display acknowledges when a button is pressed, providing confirmation with a unique color-coded response.

FOCUS ON YOUR BUSINESS WHILE WE FOCUS ON KEEPING IT SAFE AND SECURE

Mobile Control Features

Now, your alarm system can do more than just keep your office secure. You can turn your lights on and off, set your thermostat, lock your doors, view cameras and give you event notifications, all from the Virtual Keypad™ app.

USER MANAGEMENT
Add, remove, or edit users from your system. Edit user permission if you are a master user.

VIDEO
Select up to twelve wi-fi or IP video cameras and remotely view live video, recorded clips, and have video verification upon alarm.

FAVORITES
Save your most-used devices into a group so you can turn them on or off with one tap.

Web Browser Interface

Through the optional Web Portal Service, you can log into your system from any Internet-connected computer at any time and take control. Add, delete, or modify user access. Access complete data and customized reports regarding alarm status, activity at every access point, and the movement of each authorized user.

Use the Virtual Keypad™ App on your phone to manage your security system wherever you go.

- ⊘ **Access video surveillance**
- ⊘ **Manage system schedules**
- ⊘ **Control Z-Wave® devices: lights, thermostat and locks**

- ⊘ **Check your system status or check history of events to be sure your office is armed**
- ⊘ **Arm or disarm your system in an instant**
- ⊘ **Select from the Area, All or Perimeter**
- ⊘ **System arming options**

Managing Your Office and Employees' Security is Good Business

No Additional Hardware or Software

We will provide all required technology, so you don't have to purchase any additional computer resources or software at your site. We connect your security system to the Internet, with no special hardware or software. Because there's no additional hardware or software on your premises, there's nothing to program or upgrade, and no training required for your employees. We manage all routine access control system requirements, including full backups of your database.

24/7 Protection

Our trained professionals provide around-the-clock service, documenting the movement of people in and around your facility, freeing your staff from all routine security monitoring and management responsibilities. Based on your customized response plan, we will address each security event and summon fire or security forces when appropriate. We will manage your security 24 hours a day and make real-time changes with a simple phone call or e-mail from your system manager.

Your Security Professionals

We let you focus on your business while we focus on keeping it safe and secure. You get access control and a professionally monitored security system priced lower than a traditional stand-alone access control system. Your system will be totally customized, sized, and configured to meet your requirements. You can feel confident that you're realizing the greatest possible protection from your security system and are providing solid security for your facility, employees, and assets.
