

Alarm Quick Reference Sheet

Changing Master Code and Adding User Code

Put in old Master Code + 802 + New Code twice.

Adding User Codes = Master Code + 803 + User code once.

Chime

Code + 9 = **Chime on** Code + 9 = **Chime off**

Arming

When leaving home and no one is inside the house (Including Pets).

This enables the house to be fully armed with the perimeter and motion on.

There will also be a delay for entry through the entry/exit door.

Press + (**Away**)

Disarm

Enter _____ (4 Digit Code) then **Off**

Arming While at Home

While home and expecting someone else. This enables you to walk around the house freely without motion sensor activating. The perimeter will be armed with a delay at the entry/exit door.

Press + (**Stay**)

Disarm

Enter _____ (4 Digit Code) then **Off**

Bedtime Setting

When going to bed and no one is expected to enter. This enables you to walk around the house freely without motion sensor activating. The perimeter will be armed without an entry delay at the door. If any circuit is faulted, with exception of the motion sensor but including the entry/exit door, the alarm system will be activated.

Press + (**Instant**)

Disarm

Enter _____ (4 Digit Code) then **Off**

Silencing Alarms

Enter your security code and press the off key. This will silence the alarm, the faulted zone will be displayed on the keypad. To clear memory and reset system, correct faulted zone then enter your security code and press off again.

Panic Keys

To activate panic key, press and hold for at least two seconds. This will sound an audible alarm (optional on police panic) as well as notify the central station of the emergency.
